What is the MT5 FX Multi Currency Scalper application?

The FXMCS FX Multi Currency Scalper application is used for Algorithmic Currency scalping with the MetaTrader 5 currency trading platform and analyses the major eight currencies AUD, CAD, CHF, EUR, GBP, JPY, NZD and USD and all the associated 28 currency pairs AUDJPY, AUDNZD, AUDUSD, CADCHF, CADJPY, CHFJPY, EURAUD, EURCAD, EURCHF, EURGBP, EURJPY, EURNZD, EURUSD, GBPAUD, GBPCAD, GBPCHF, GBPJPY, GBPNZD, GBPUSD, NZDCAD, NZDCHF, NZDJPY, NZDUSD, USDCAD, USDCHF, USDJPY.

What will the MT5 FX Multi Currency Scalper application do for me?

The FXMCS MT5 FX Multi Currency Scalper will:

- Make 2352 price calculations every second for the 28 major currency combinations to perform 100% accurate algorithmic scalping.
- Provide accuracy to each second of the day, to display the correct direction for your Forex trades: red to sell, blue to stand-aside, and green to buy.
- Display accurate trading information based on real facts, not an opinion to:
 - Show you the currency pairs which have little trading risk.

- Show you the currency pairs which have significant trading risk.
- Help you to become profitable as a Forex Trader.

How successful is the MT5 FX Multi Currency Scalper application?

The FXMCS MT5 FX Multi Currency Scalper in one day, as shown on this real trading account image, had a 100%-win rate, using the default settings.

How does the MT5 FX Multi Currency Scalper application work?

The MT5 FXMCS consistently calculates 2352 items of price data every second and adjusts in real-time for all the 1, 5, 15, 30, 60, 120, 180, 240, 360, 480, 720 minutes, daily and weekly timeframes, to display and to perform algorithmic currency scalping based on conditions for all 28 currency pairs, accurately.

The FX Multi Currency Scalper has 60,000 lines of AI Artificial Intelligence code to analyse and scalp the 28 Forex currency pairs accurately.

The MT5 FXMCS does not use historical data like many other Forex currency applications, it gives you up-to-the-minute real-time accuracy, by taking all the hard work out of looking at 28 currency charts to see which currencies have the right trading conditions to identify potential candidates for each side of a Forex trade.

What are the features of the MT5 FX Multi Currency Scalper?

- AI Algorithmic Currency Trading, based on trend and currency volatility
- Market Open and Closed Intelligence
- Timeframe selection - 1M, 5M, 15M, 30M, 1H, 2H, 3H, 4H, 6H, 8H, 12H, Daily and Weekly
- Equity selection, from 0.1% to 50%
- Manual or Auto Volume selection, from 0.01 to 10
- Take Profit selection from 0 to 10000 points
- Volatility Period selection from 2 to 100
- Volatility Value from 0.5 to 10 for Auto Stop-loss
- Dynamic trade closure with account analysis reporting
- Trade sound alerts
- Reset and save settings options

FXMCS Installation Instructions

Note: The official MetaTrader 5 help website contains excellent detailed advanced information on their platform File and Folder Structure to help you install the MT5 FX Multi Currency Scalper application.

1. Install the MT5 FX Multi Currency Scalper application to your PC, using the downloaded setup file as an Administrative level user from the <https://www.fxmcsm.com/fx-multi-currency-robot-mt5.html> webpage, where it says "Click to Download."
2. Install the FREE Metatrader API bridge software available from https://www.fxmcsm.com/software/MtApi5_Setup_x64.exe as an Administrative level user.
3. Once the above two applications are installed, navigate using Windows Explorer to your MT5 FX Multi Currency Scalper application installation folder, e.g. C:\Program Files\FX Multi Currency Scalper MT5:

- Copy the FXMCS-MT5-8227-v1.7.ex5 file, from the FX Multi Currency Scalper MT5\MT5-Experts folder to your brokers Metatrader 5 application experts' folder which is similar to, e.g. C:\Users\trader192.FOREX-PC\AppData\Roaming\MetaQuotes\Terminal\D0E8209F77C8CF37AD8BF550E51FF075\MQL5\Experts
- Copy the FXMCS-MT5-Connect.dll file, from the MT5-Libraries folder to your brokers Metatrader 5 application Libraries folder which is similar to e.g. C:\Users\trader192.FOREX-PC\AppData\Roaming\MetaQuotes\Terminal\D0E8209F77C8CF37AD8BF550E51FF075\MQL5\Libraries

4. Open your brokers Metatrader 5 application and navigate to the Tools > Options menu option:

- Click on the Charts tab, and change the "Max bars in chart:" setting to 5000.
- Click on the Expert Advisors tab, and check the "Allow automated trading", and the "Allow DLL imports" checkboxes.
- Click the OK button.

5. Attach the FXMCS-MT5-8227-v1.7.ex5 expert to any MetaTrader 5 chart using a 1-minute timeframe setting, then press the F7 function key on your keyboard. Alternatively open the FXMCS-MT5-8227-v1.7.ex5 properties on the Metatrader 5 chart, to check that "Allow automated trading" checkbox has been checked. If it is not, then, click the checkbox to enable it, and click the OK button.

6. Start the MT5 FXMCS application, which begins to communicate to your Metatrader 5 application, and within minutes start to analyse the currency markets for suitable trades.

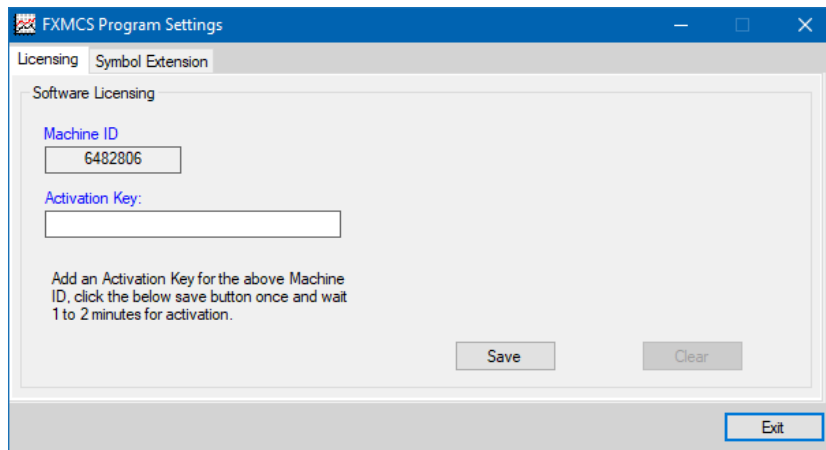

7. Each of the 28 currency pairs has to be enabled on the MT5 Market Watch screen to send price data to the FX Multi Currency Scalper.

8. If your Broker uses a non-six-character symbol such as AUDCAD.ecn, then enter the .ecn into the symbol extension tab, on the Licensing screen and restart the FXMCS.

Please Note: If the MT5 FXMCS does not display Metatrader 5 price data during Forex trading hours, then check each of the above steps from the beginning until the data is displayed.

FXMCS Licensing

To activate the FXMCS. Just click on the Licensing button on the Settings tab, and a Licensing screen displays, where you can enter your licence activation key, click the Save and Exit buttons, then restarting the FXMCS.

How to use the FXMCS

1. We recommend that you configure the settings to your trading strategy requirements.
2. Enable individually or all currency pairs auto trading, using the auto trade switch on the main screen.
3. Monitor your trading performance using the application.

The Dashboard Explained

The screenshot shows the 'MT5 Forex Multi Currency Scalper' dashboard. It features a table with the following columns: Symbol, Analysis, Condition, T1, T2, T3, Manual Trade, and Auto Trade. Each row represents a currency pair with corresponding status indicators (On/Off) and colored bars for the T1, T2, and T3 conditions.

Symbol	Analysis	Condition	T1	T2	T3	Manual Trade	Auto Trade
AUDCAD	On	Blue	Green	Green	Green	Off	Off
AUDCHF	On	Green	Green	Green	Green	Off	Off
AUDJPY	On	Green	Green	Green	Green	Off	Off
AUDNZD	On	Blue	Red	Red	Green	Off	Off
AUDUSD	On	Blue	Green	Green	Green	Off	Off
CADCHF	On	Blue	Green	Red	Red	On	On
CADJPY	On	Blue	Red	Red	Red	On	On
CHFJPY	On	Blue	Green	Red	Red	On	On
EURAUD	On	Red	Green	Red	Red	Off	Off
EURCAD	On	Blue	Red	Green	Green	Off	Off
EURCHF	On	Blue	Green	Green	Green	Off	Off
EURGBP	On	Blue	Green	Green	Green	Off	Off
EURJPY	On	Blue	Green	Red	Red	On	On
EURNZD	On	Blue	Red	Red	Red	On	On

Analysis

When the Robot is started, the 28 currency pair toggle switches in the Analysis column are set in the "On" position. Individually the currency pairs can be switched to the "Off" position if not needed for analysis and trading.

Condition

The Condition column provides a quick status for each currency pair. The "Condition" panels display three different colours according to the analysis and trade conditions, blue for no trade, green for a buy trade and red for a sell trade.

Sp

The Sp column shows the spread for each currency pair, to assist with trade selection, which is updated at 1-second intervals.

T1

The T1 column shows the volatility for each currency pair, green for rising volatility for buy and sell trades, and red for lowering volatility.

T2

The T2 column shows the current timeframe trend, green for an upward trend and red for a downward trend.

T3

The T3 column shows the higher timeframe trend, green for an upward trend and red for a downward trend.

Manual Trade

The Manual Trade column toggle switches can be switched on for individual currency pairs, to just enable one-time trading for select currency pairs.

Auto Trade

The Auto Trade column toggle switches can be switched on for individual currency pairs, which has a similar function to the above "Manual Trade" toggle switches, except that buy and sell trades will be automatically executed, until the "Auto Trade" toggle is again switched off.

All 28 currency pairs can be switched "On" by using the single "Auto Trade" toggle switch below the USDJPY currency pair.

FXMCS Configurations

Timeframe	Daily	Select the timeframe to use for analysis and trading
Total No. Positions	28	Select the total number of symbols to trade with, default no. is 28
Equity %	0.1	Select the equity % for the Auto Volume, default is 0.1%
Auto-Volume	On <input checked="" type="checkbox"/>	Select Off for manual volume, or On for Auto-Volume, default is On
Volume	0.01	Select the manual trade volume, default volume is 0.01
Take Profit	1000 points	Select the take-profit setting in points, default is 100
Volatility Period	20	Select the average volatility period in days for the dynamic Stop Loss
Volatility Value	2.0	Select the volatility value, for the dynamic Stop Loss, default is 2
Alerts	Off <input type="checkbox"/>	Select On to enable sound alerts, default is Off

These all should all be set, as per your scalping strategy and risk appetite, or use the default settings, and saved to disk using the Settings tab, Save Settings button.

If you wish to reset the settings to default at any time, just click the "Reset Settings to Default" button on the Settings tab.

Timeframe

Select the timeframe to use for analysis and trading.

Total No. of Positions

Select the total number of symbols for Auto Volume calculations, default no. is 28. This option is used when the Auto Volume switch is enabled.

Equity%

Select your maximum equity % you are risking, for the Auto Volume calculations, default is 0.1%. This option is only used when the Auto Volume switch is enabled.

Auto Volume

Select On for auto-equity % and volume, or Off for manual volume settings. Any calculated volume size of less than 0.01 automatically is allocated the default value of 0.01.

Volume

After switching the Auto Volume switch off, you can select the manual trade volume; default volume is 0.01.

Switching off the Auto Volume switch means that you have to calculate your own volume (Lot) calculations for your trading, using the available Equity amount, times by your "Equity%", divided by the number of "Currency pairs" you are trading, which is then divided by the "No. of Positions" for each currency pair, and then times by the Volume Step value from your Broker.

E.g. an Equity balance of 10000 x 2% equity / 28 currency pairs / 1 the number of individual positions, times by the Broker's Volume Step value of 0.01, equals a volume size for each trade of 0.07. Trading 28 currency pairs, with up to 10 symbol positions equals 280 possible deals, which require sharing between all the available equity balance.

In contrast, the Auto-Volume does all this work to determine the most optimum volume size for each trade according to your trading strategy settings.

Take Profit

Select your take-profit setting for all currency pairs in points; default is 1000. This setting is not able to be used with the Auto Trade Closure switch option.

Volatility Period

Select the volatility period in days, for the dynamic Stop-Loss; default is 20. This option is only used when if the Stop Loss switch is enabled.

Volatility Value

Select the volatility value, which is used with the Volatility Period, for the dynamic Stop-loss; default is 2. This option is only used if the Stop Loss switch is enabled.

Alerts

Select On to enable trade sound alerts; default is Off

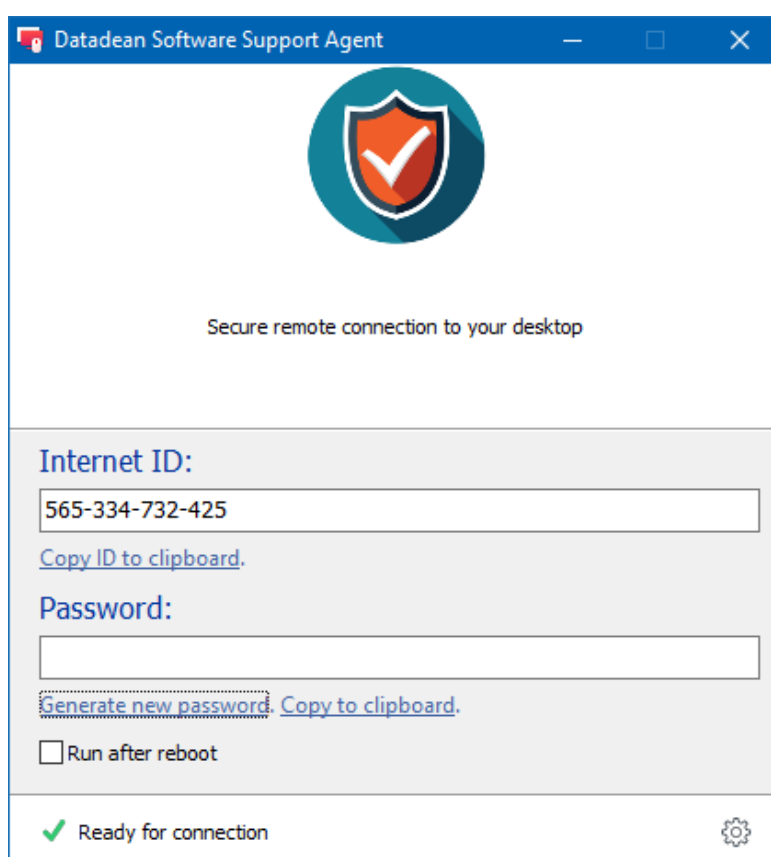

Troubleshooting the FXMCS

The FXMCS stops updating the dashboard, analysis and account tabs. This problem may be due to a firewall restriction or MetaTrader 5 being overloaded with scripts, experts and indicators, preventing the FXMCS expert communicating with the FXMCS application. To fix, reduce the load on your MetaTrader 5 terminal, and restart the FXMCS.

Remote Software Support

Our partner company Cyberteam Security Services provides software installation support for the FXMCSM licensed software products, using the FREE, safe and secure 'Remote Utilities' remote support application which can be downloaded by visiting the link at:

<https://www.fxmcsm.com/software/Datadean.Software.Support.Agent.6.10.10.0.exe>

To arrange remote software support, all you need is your PayPal transaction number, the InternetID number, the unique temporary password, to add to a helpdesk technical support ticket to arrange a 30-minute support call. This time is usually enough to install our Forex software products to any up-to-date Microsoft Windows 7, 8, and 10 computers.

The technical support helpdesk can be found at: <https://cyberteamsupportsystem.com/>
